Planning is key at Superior. Our crew will design a plan based off weight assumptions, logistics, your timeline and necessary equipment. No matter your project size, Superior can meet your heavy machinery moving needs.

Machinery moving is an essential service in various industries like manufacturing, mechanical, electrical, data centers, and more. Whether it's a single piece of equipment or an entire plant, we understand the intricacies involved in moving heavy machinery and oversized equipment.

Our strength lies in our extensive experience and hard-earned expertise. With years of hands-on experience under our belts, we provide top-notch rigging services, offering our clients the best service backed by a strong work ethic.

Our top priority is to ensure minimal disruptions to your ongoing operations, taking the weight off your production schedule while we perform our tasks.

We offer a wide range of services, from relocating machinery within your facility to transporting it on our trucks. Our services include assembly, dismantling, and maintenance of industrial machinery. Our skilled movers are experts at maneuvering heavy equipment in tight spaces, such as stairways and elevated access points. We also provide continuous maintenance services, which are particularly beneficial for data centers.

We have extensive experience in the mechanical, electrical, and industrial sectors, and have worked with independent companies. Our partners include water treatment facilities, paper mills, and oil reclamation plants.

We have moved various equipment, such as boilers, motors, generators, rollers, fabric machines, and printing machines. Additionally, we have installed comprehensive fire protection systems, showcasing our versatility.

We use the latest technology and equipment, including mini cranes, gantries, versa lifts, and large forklifts.

Website: kingdommovers.co.ke

Our gantry systems can handle loads up to 400 tons. We also employ techniques like swivel skates, jacking, and setting/skating to move machinery with precision. Additionally, we use advanced rigging tools and custom-built platforms to ensure safe and efficient handling of all types of machinery. Due to their unique extending frame, hoist forklifts are able to lift up to 40 tonnes, safely and smoothly.

Air skates used compressed air to accurately float heavy loads into position with a much lower risk of floor damage.
