## **Page: Stella Njambi - Graphic Designer**

A creative designer on a mission to help growth-focused brands stand out, by turning bold concepts into designs that leave a lasting impression.

I've worked with a variety of great businesses and individuals within my time in the design space and I believe that every brand has a unique story that makes it stand out. I specialize in creating UI/UX, branding strategy, and packaging design for bold brands looking for a unique twist.

My world revolves around creating designs that connect on a deeper level. Whether it's crafting digital experiences that users love, capturing your brand's essence through visuals, or designing packaging that gets people talking, I'm here to help bring your vision to life

Brand design is more than just looks; it's strategy in action. The main goal is to make sure we can create a unique identity that really clicks with your audience. Your brand needs to look and feel consistent everywhere. And as the market shifts, it will stay ahead of the curve, ensuring its relevance and resonance. Let's work together to create a brand that not only captures the eye but also communicates your brand's essence.

Imagine strolling through a store, surrounded by products. What makes you stop and take a closer look? It's the packaging! Packaging design is about making your brand memorable in the blink of an eye. It's that satisfying feeling as you unbox a product and the anticipation it builds. Think of it as your brand's silent ambassador. Whether it's a cozy familiarity or a burst of excitement, I'll help you design packaging that turns each unboxing into a memorable experience.

Think of a website or app that feels like a helpful companion, intuitively understanding users and offering a smooth journey. UI/UX is about designs that are both visually appealing and user-friendly. From responsive websites that adapt seamlessly to devices to apps that embody your brand's essence, count on me for user-centric designs. Together, we'll create digital experiences that stand out and keep users engaged.

From the initial discovery call all the way to the final handover, this is going to be an open space for us to have a collaborative experience & make sure you're expectations are met.

Enquire

We'll hop on a discovery call, so that you can tell me more about what you need and to find out if we're a good fit to work together.

#### Brainstorm

Here we will work together to gather all the information needed to craft an effective strategy for your designs!

#### Design

The fun part! Once you receive your designs you'll have the chance to give feedback and request any changes if needed!

#### Launch

Once you are 100% happy with your designs, your final files will be sent to you ready to be launched to the world!

Have a glimpse at how I have helped other individuals and businesses turn their big ideas into strategic designs.

I'm not saying we're going to be a perfect fit and I'm going to swoop in and make your problems go away. But we can discuss to see if there's a possibility of working together to support you and help you grow your business.
